SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/21/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

**Office Action Summary**

Application No.

09/886,538

Applicant(s)

HARARI, ADI

Examiner

Thomas Duong

Art Unit

2145

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 30 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 3-10 and 12-16 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 3-10 and 12-16 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

## **DETAILED ACTION**

### ***Request for Continued Examination***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.
2. Amendment received January 30, 2007 has been entered into record. *Claims 3-10 and 12-16* remain pending.

### ***Response to Amendment***

3. This office action is in response to the applicants Amendment filed on January 30, 2007. Applicant amended *claims 3-4, 12, and 15*. *Claims 3-10 and 12-16* are presented for further consideration and examination.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2145

5. Claims 3-10, 12, and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Celik (US006374259B1), in view of Delany et al. (US006658454B1), and further in view of Cheah (US007003546B1).

6. With regard to claim 3, Celik discloses,

- *receiving, over the Internet, contact information regarding a user;* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)

Celik teaches of “*an information management method [that] includes step of ... storing information coupled to a remote computer*” (Celik, col.1, lines 51-55) by allowing “*a user (hereinafter User 1) of the first personal computer 12 to [access] the remote computer over the internet to input business contact information of User 1 or other information that User 1 wishes to store in the database 18*” (Celik, col.4, lines 12-16).

- *storing in a computer accessible memory the contact information regarding the user;* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)

Celik teaches of “*an information management method [that] includes step of ... storing information coupled to a remote computer*” (Celik, col.1, lines 51-55) by allowing “*a user (hereinafter User 1) of the first personal computer 12 to [access] the remote computer over the internet to input business contact information of User 1 or other information that User 1 wishes to store in the database 18*” (Celik, col.4, lines 12-16).

Art Unit: 2145

- *receiving, over the Internet, information regarding contacts of the user; (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)*

Celik teaches of “*an information management method [that] includes step of ... storing information coupled to a remote computer*” (Celik, col.1, lines 51-55) by allowing “*a user (hereinafter User 1) of the first personal computer 12 to [access] the remote computer over the internet to input business contact information of User 1 or other information that User 1 wishes to store in the database 18*” (Celik, col.4, lines 12-16). Hence, Celik implies of a user inputting business contact information or other information such as contact information of business acquaintances, family members, friends, etc. into the database on the remote computer.

However, Celik does not explicitly disclose,

- *forming a distribution list of the contacts of the user using the information regarding contacts the user; and*

Delany teaches,

- *forming a distribution list of the contacts of the user using the information regarding contacts the user; and (Delany, col.4, line 22 – col.5, line 45)*

Delany teaches of “*a distribution or ‘mailing list’ [that] is employed to facilitate the process of sending an e-mail message to a group of people*” (Delany, col.4, lines 27-28) when sending e-mail; wherein the “*mailing list can be used in the recipient field for an e-mal message, in lieu of listing individual members, so that a message sent to this distribution list goes to all recipients listed*” (Delany, col.4, lines 41-44).

Art Unit: 2145

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Delany with the teachings of Celik to provide an information management method wherein *"instead of addressing an e-mail message to individual members of a recurring group, a user can instead simply define a mailing list to comprise those members"* (Delany, col.4, lines 29-31) wherein *"a distribution or 'mailing list' is employed to facilitate the process of sending an e-mail message to a group of people"* (Delany, col.2, line 66 – col.3, line 1).

However, Celik and Delany do not explicitly disclose,

- *providing the contact information regarding the user to at least some of the contacts of the user on the distribution list automatically in response to receiving updated contact information of the user.*

Cheah teaches,

- *providing the contact information regarding the user to at least some of the contacts of the user on the distribution list automatically in response to receiving updated contact information of the user.* (Cheah, col.1, line 14 – col.30, line 39)

Cheah discloses, *"additionally, since contact information is dynamic and needs to be maintained, another aspect of the invention is the automatic update of the previously distributed contact information. Hence, should the contact information change after its distribution to certain registered users, then the updated contact information is able to be distributed to the certain registered users in an automated manner"* (Cheah, col.2, lines 25-31). Hence, Cheah teaches of distributing the updated contact information of a user to the registered users on the distribution list automatically.

Art Unit: 2145

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Cheah with the teachings of Celik and Delany to provide an information management method wherein *"instead of addressing an e-mail message to individual members of a recurring group, a user can instead simply define a mailing list to comprise those members"* (Delany, col.4, lines 29-31) wherein *"a distribution or 'mailing list' is employed to facilitate the process of sending an e-mail message to a group of people"* (Delany, col.2, line 66 – col.3, line 1). In addition, Cheah discloses, *"thus, there is a need for improved approaches to automatically distribute and update contact information"* (Cheah, col.1, lines 66-67).

7. With regard to claims 4-5 and 16, Celik, Delany, and Cheah, disclose,

- *wherein providing the contact information to at least some of the contacts of the user on the distribution list comprises sending an e-mail to at least some of the contacts of the user on the distribution list.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31; Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)
- *wherein the at least some of the contacts of the user on the distribution list are those contacts of the user on the distribution list having an e-mail address.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31; Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)

8. With regard to claims 6-8, Celik, Delany, and Cheah, disclose,

- *wherein receiving contact information regarding the user comprises receiving by a server contact information regarding the user from a client.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31; Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)
- *wherein the server sends the e-mails to at least some the contacts of the user the distribution list.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31; Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)
- *wherein the user is a registered user and e-mails are sent to contacts of the user who are not registered users.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31; Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)

9. With regard to claims 9-10 and 12, Celik, Delany, and Cheah, disclose,

- *wherein the contact information regarding the user comprises updated contact information regarding the user.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31; Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)
- *wherein the server sends the e-mails to at least some of the contacts of the user in the distribution list.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22;

Art Unit: 2145

col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31;

Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)

- *further comprising data stamping the contact information of the user.* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31; Delany, col.4, line 22 – col.5, line 45; Cheah, col.1, line 14 – col.30, line 39)

10. With regard to claim 15, Celik discloses,

- a server receiving contact information and a contact list for each of a plurality of users; (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)

Celik teaches of “an information management method [that] includes step of ... storing information coupled to a remote computer” (Celik, col.1, lines 51-55) by allowing “a user (hereinafter User 1) of the first personal computer 12 to [access] the remote computer over the internet to input business contact information of User 1 or other information that User 1 wishes to store in the database 18” (Celik, col.4, lines 12-16). Hence, Celik teaches of a server containing a database used to store the unique user identification numbers.

- *a mass storage device coupled to the server, the mass storage device storing the contact information and the contact list for each of the plurality of users;* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)

Celik teaches of “an information management method [that] includes step of ... storing information coupled to a remote computer” (Celik, col.1, lines 51-55) by

allowing *"a user (hereinafter User 1) of the first personal computer 12 to [access] the remote computer over the internet to input business contact information of User 1 or other information that User 1 wishes to store in the database 18"* (Celik, col.4, lines 12-16). Hence, Celik teaches of a server containing a database used to store the unique user identification numbers.

- *wherein the server is configured to:*

- *assign an identifier to the contact information of each of the plurality of users;* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)

Celik teaches of *"the information management method includes steps of assigning a first user a unique user identification number, storing information related to the first user in a remote database operatively coupled to a remote computer"* (Celik, col.1, lines 51-55). In addition, according to Celik, *"the remote database containing contact information for each of a plurality of users of the information management system, wherein each of the users is assigned a unique user identification number"* (Celik, col.2, lines 11-15).

Hence, Celik teaches of assigning each user a unique identification number.

- *date stamp the contact information of each of the plurality of users;* (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)

Celik discloses, *"both the synchronizer and the database maintain an update log indicating the last time that contact information for a user has been updated. The update log in the database indicates the last time that the user edited his contact information in the database, and the update log in the*

*synchronizer indicates the last time that the contact information in the PIM for the user has been updated” (Celik, col.10, lines 11-18). Hence, Celik teaches of indicating the last time that contact information for a user has been updated or synchronized through the use of date stamping.*

- *determine whether contact information of a specific user is synchronized with contact list of another specific user; (Celik, col.1, lines 50-58; col.2, lines 8-26; col.4, lines 8-22; col.4, line 64 – col.5, line 15; col.8, line 53 – col.9, line 28; col.10, lines 11-31)*

*Celik discloses, “both the synchronizer and the database maintain an update log indicating the last time that contact information for a user has been updated. The update log in the database indicates the last time that the user edited his contact information in the database, and the update log in the synchronizer indicates the last time that the contact information in the PIM for the user has been updated” (Celik, col.10, lines 11-18). Hence, Celik teaches of indicating the last time that contact information for a user has been updated or synchronized through the use of date stamping.*

However, Celik does not explicitly disclose,

- *a server receiving contact information and contact list information for each of a plurality of users;*

Delany teaches,

- *a server receiving contact information and contact list information for each of a plurality of users; (Delany, col.4, line 22 – col.5, line 45)*

*Delany teaches of “a distribution or ‘mailing list’ [that] is employed to facilitate the process of sending an e-mail message to a group of people” (Delany, col.4, lines*

27-28) when sending e-mail; wherein the *"mailing list can be used in the recipient field for an e-mal message, in lieu of listing individual members, so that a message sent to this distribution list goes to all recipients listed"* (Delany, col.4, lines 41-44).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Delany with the teachings of Celik to provide an information management method wherein *"instead of addressing an e-mail message to individual members of a recurring group, a user can instead simply define a mailing list to comprise those members"* (Delany, col.4, lines 29-31) wherein *"a distribution or 'mailing list' is employed to facilitate the process of sending an e-mail message to a group of people"* (Delany, col.2, line 66 – col.3, line 1).

However, Celik and Delany do not explicitly disclose,

- *provide contact information of a specific user to at least some of the users indicated in contact list for the specific user automatically when the contact information for the specific user changes.*

Cheah teaches,

- *provide contact information of a specific user to at least some of the users indicated in contact list for the specific user automatically when the contact information for the specific user changes. (Cheah, col.1, line 14 – col.30, line 39)*

Cheah discloses, *"additionally, since contact information is dynamic and needs to be maintained, another aspect of the invention is the automatic update of the previously distributed contact information. Hence, should the contact information change after its distribution to certain registered users,*

*then the updated contact information is able to be distributed to the certain registered users in an automated manner” (Cheah, col.2, lines 25-31).*

Hence, Cheah teaches of distributing the updated contact information of a user to the registered users on the distribution list automatically.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Cheah with the teachings of Celik and Delany to provide an information management method wherein *“instead of addressing an e-mail message to individual members of a recurring group, a user can instead simply define a mailing list to comprise those members”* (Delany, col.4, lines 29-31) wherein *“a distribution or ‘mailing list’ is employed to facilitate the process of sending an e-mail message to a group of people”* (Delany, col.2, line 66 – col.3, line 1). In addition, Cheah discloses, *“thus, there is a need for improved approaches to automatically distribute and update contact information”* (Cheah, col.1, lines 66-67).

11. Claims 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Celik (US006374259B1), in view of Delany et al. (US006658454B1), in view of Cheah (US007003546B1), and further in view of Fisher et al. (US006047264A).
12. With regard to claims 13-14, Celik, Delany, and Cheah, disclose,  
See *claim 3* rejection as detailed above.  
However, Celik, Delany, and Cheah do not explicitly disclose,
  - *further comprising maintaining at least one flag indicating whether a contact of the user should receive automatic updates of contact information of the user.*

Art Unit: 2145

- *further comprising maintaining at least one flag indicating whether the user should receive automatic updates of contact information of a contact of the user.*

Fisher teaches,

- *further comprising maintaining at least one flag indicating whether a contact of the user should receive automatic updates of contact information of the user.*

(Fisher, col.1, line 56 – col.2, line 40; col.3, line 59 – col.4, line 27)

Fisher teaches of a “status receiver 14 [that] signals electronic mail messenger 15, via an ‘Updated Status’ flag in the appropriate database records, that a new update message should be sent” (Fisher, col.4, lines 4-8). Hence, Fisher teaches the use of a flag to indicate that a particular record should receive automatic updates upon their availability.

- *further comprising maintaining at least one flag indicating whether the user should receive automatic updates of contact information of a contact of the user.*

(Fisher, col.1, line 56 – col.2, line 40; col.3, line 59 – col.4, line 27)

Fisher teaches of a “status receiver 14 [that] signals electronic mail messenger 15, via an ‘Updated Status’ flag in the appropriate database records, that a new update message should be sent” (Fisher, col.4, lines 4-8). Hence, Fisher teaches the use of a flag to indicate that a particular record should receive automatic updates upon their availability.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Fisher with the teachings of Celik, Delany, and Cheah to provide an information management method wherein “instead of addressing an e-mail message to individual members of a recurring group, a user can instead simply define a mailing list to comprise those members”

Art Unit: 2145

(Delany, col.4, lines 29-31) wherein "*a distribution or 'mailing list' is employed to facilitate the process of sending an e-mail message to a group of people*" (Delany, col.2, line 66 – col.3, line 1).

### ***Response to Arguments***

13. Applicant's arguments with respect to *claims 3 and 15* have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Duong whose telephone number is 571/272-3911. The examiner can normally be reached on M-F 7:30AM - 4:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason D. Cardone can be reached on 571/272-3933. The fax phone numbers for the organization where this application or proceeding is assigned are 571/273-8300 for regular communications and 571/273-8300 for After Final communications.

Thomas Duong (AU2145)
